(Contd. of page 1) · 2.2 Label elements · Labelling according to Regulation (EC) No 1272/2008 The product is classified and labelled according to the CLP regulation. · Hazard pictograms GHS05 GHS07 · Signal word Danger · Hazard-determining components of labelling: **Portland Cement** · Hazard statements H315 Causes skin irritation. H318 Causes serious eye damage. H317 May cause an allergic skin reaction. H335 May cause respiratory irritation. · Precautionary statements P101 If medical advice is needed, have product container or label at hand. P102 Keep out of reach of children. Read carefully and follow all instructions. P103 P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/doctor. P310 Specific treatment (see on this label). P321 P362+P364 Take off contaminated clothing and wash it before reuse. P405 Store locked up. P501 Dispose of contents/container in accordance with local/regional/national/ international regulations. · Additional information: Contains Portland Cement. May produce an allergic reaction. · 2.3 Other hazards · Results of PBT and vPvB assessment · PBT: Not applicable. · vPvB: Not applicable.

SECTION 3: Composition/information on ingredients

· 3.2 Mixtures

· Description: Mixture of substances listed below with nonhazardous additions.

Dangerous components:

CAS:65997-15-1 Portland Cement 25-50% EC no: 266-043-4 Eye Dam. 1, H318; (1) Skin Irrit. 2, H315; Skin Sens. 1B, H317; STOT SE 3, H335

· Additional information: For the wording of the listed hazard phrases refer to section 16.

### SECTION 4: First aid measures

· 4.1 Description of first aid measures

· General information:

Immediately remove any clothing soiled by the product.

Do not give something by mouth to the affected person.

In case of doubt or symptoms occurring, consult to the doctor.

(Contd. on page 3)

### Trade name: 101 POWERMIT-FIX: CERAMIC ADHESIVE C1T

(Contd. of page 4) · Additional information: Exposure limit for dust: 3 mg/m3 (respirable fraction) 10 mg/m3 (total dust) The lists valid during the making were used as basis. · 8.2 Exposure controls · Appropriate engineering controls No further data; see section 7. Individual protection measures, such as personal protective equipment General protective and hygienic measures: Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing Wash hands before breaks and at the end of work. Avoid contact with the eyes and skin. Do not eat, drink, smoke or sniff while working. Keep the working environment clean and tidy. Ensure that eye wash stations are available at the work place. Provide good ventilation. Respiratory protection: In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device. Use suitable respiratory protective device in case of insufficient ventilation. Hand protection Protective gloves The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation Material of gloves The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application. The gloves should comply to EN374 Penetration time of glove material The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed. Penetration time > 480 min. Eye/face protection Tightly sealed goggles · Body protection: Chemical resistant protective clothing Antistatic shoes

### SECTION 10: Stability and reactivity

· 10.1 Reactivity No further relevant information available.

· 10.2 Chemical stability

- Thermal decomposition / conditions to be avoided: Unstable in contact with acids.
- 10.3 Possibility of hazardous reactions No dangerous reactions known.
- 10.4 Conditions to avoid No further relevant information available.

• **10.5** *Incompatible materials:* No further relevant information available.

• 10.6 Hazardous decomposition products:

Irritant gases/vapours

Possible in traces.

### **SECTION 11: Toxicological information**

#### $\cdot$ 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

• Acute toxicity Based on available data, the classification criteria are not met.

· LD/LC50 values relevant for classification:

65997-15-1 Cement, portland, chemicals

Dermal LD50 >2000 mg/kg (rabbit)

9004-62-0 hecellose

Oral LD50 >2000 mg/kg (rat)

Skin corrosion/irritation Causes skin irritation.

- · Serious eye damage/irritation Causes serious eye damage.
- Respiratory or skin sensitisation May cause an allergic skin reaction.
- · Germ cell mutagenicity Based on available data, the classification criteria are not met.
- · Carcinogenicity Based on available data, the classification criteria are not met.
- · Reproductive toxicity Based on available data, the classification criteria are not met.
- STOT-single exposure May cause respiratory irritation.
- STOT-repeated exposure Based on available data, the classification criteria are not met.
- · Aspiration hazard Based on available data, the classification criteria are not met.
- 11.2 Information on other hazards
- · Endocrine disrupting properties

None of the ingredients is listed.

## **SECTION 12: Ecological information**

· Aquatic toxicity: 9004-62-0 hecellose		
EC50/48h	>100 mg/l (daphnia)	
EC50/72h	>100 mg/l (Scenedesmus subspicatus)	
LC50/96h	>500 mg/l (danio rerio)	
· 12.3 Bioad	stence and degradability No further relevant information available. ccumulative potential No further relevant information available. lity in soil No further relevant information available.
