**SECTION 3: Composition/information on ingredients** 

· 3.2 Mixtures

· **Description:** Mixture of substances listed below with nonhazardous additions.

· Dangerous components:

CAS:65997-15-1 Portland Cement 25-50% EC no: 266-043-4 See Dam. 1, H318; Skin Irrit. 2, H315; Skin Sens. 1B, H317; STOT SE 3, H335

### • Additional information: For the wording of the listed hazard phrases refer to section 16.

# SECTION 4: First aid measures

· 4.1 Description of first aid measures

· General information:

Immediately remove any clothing soiled by the product.

Do not give something by mouth to the affected person.

In case of doubt or symptoms occurring, consult to the doctor.

<ul> <li>After inhalation: Supply fresh air and to be sure call for a doctor.</li> </ul>	
Supply fresh air and to be sure call for a doctor.	
After skin contact:	
Immediately wash with water and soap and rinse thoroughly.	
If skin irritation continues, consult a doctor.	
Immediately remove any clothing soiled with the product.	
· After eye contact:	
Rinse opened eye for several minutes under running water. Then consult a doctor	
Remove contact lenses.	
After swallowing:	
Never give to the unconscious victim anything by mouth.	
Do not induce vomiting; call for medical help immediately.	
Rinse out mouth and then drink plenty of water. A person vomiting while laying on their back should be turned onto their side.	
• 4.2 Most important symptoms and effects, both acute and delayed	
No further relevant information available.	
$\cdot$ 4.3 Indication of any immediate medical attention and special treatment need	led
Never give anything to the unconscious person.	
If swallowed, do not induce vomiting.	
If swallowed or in case of vomiting, danger of entering the lungs.	
In case of doubt and symptoms occurring, consult to the doctor.	
Treat symptometically.	
SECTION 5: Firefighting measures	
5 1 Extinguishing modio	
· 5.1 Extinguishing media · Suitable extinguishing agents:	
CO2, powder or water spray. Fight larger fires with water spray or alcohol resistan	t foam
• 5.2 Special hazards arising from the substance or mixture	t louin.
Do not inhale combustion products.	
During fire conditions, harmful gases are produced.	
Can form explosive dust-air mixtures.	
Dust should not be allowed to accumulate in the environment.	
•	
Dust should not be allowed to accumulate in the environment. In case of fire, the following can be released: Calcium oxide

<ul> <li>Avoid formation of dust.</li> <li>Use respiratory protective device against the effects of fumes/dust/aerosol.</li> <li>Avoid contact with eyes, skin and cloths</li> <li>6.2 Environmental precautions:</li> <li>Inform respective authorities in case of seepage into water course or sewage system.</li> <li>Do not allow to enter sewers/ surface or ground water.</li> <li>6.3 Methods and material for containment and cleaning up:</li> <li>Pick up mechanically.</li> <li>Send for recovery or disposal in suitable receptacles.</li> <li>Dispose contaminated material as waste according to section 13.</li> <li>Ensure adequate ventilation.</li> <li>6.4 Reference to other sections</li> <li>See Section 7 for information on safe handling.</li> <li>See Section 8 for information on personal protection equipment.</li> </ul>	bage 0)
See Section 13 for disposal information.	
SECTION 7: Handling and storage	
<ul> <li><i>7.1 Precautions for safe handling</i> Thorough dedusting. Ensure good ventilation/exhaustion at the workplace. Prevent formation of dust. Provide suction extractors if dust is formed. Use appropriate industrial vacuum cleaners or central vacuum systems for dust removal. In order to eliminate the risk of explosion, prevent formation of dust on top of the surfaces. Do not breathe the formed dust, do not let dust to contact with skin, eyes and clothing. In case of formation of dust, take necessary precautions to prevent static electricity formation. Store in cool, dry place in tightly closed receptacles. Keep away from heat and direct sunlight. Do not use pressurized air to empty containers. </li> </ul>	
<ul> <li>7.2 Conditions for safe storage, including any incompatibilities</li> <li>Storage:</li> <li>Requirements to be met by storerooms and receptacles: Store in a cool location.</li> <li>Store only in the original receptacle.</li> <li>Information about storage in one common storage facility:</li> <li>Do not store together with heat sources, open flame or ignition sources.</li> <li>Do not store together with incompitable materials.</li> <li>Store away from food material and animal feed.</li> <li>Store away from dust sensitive materials.</li> <li>Store away from dust sensitive materials.</li> <li>Store away from water.</li> <li>Further information about storage conditions:</li> <li>Keep container tightly sealed.</li> <li>Store receptacle in a well ventilated area.</li> <li>Protect from heat and direct sunlight.</li> <li>Store in cool, dry conditions in well sealed receptacles.</li> <li>Protect from humidity and water.</li> <li>7.3 Specific end use(s) No further relevant information available.</li> </ul>	
SECTION & Expedition controls/personal protection	

### SECTION 8: Exposure controls/personal protection

· 8.1 Control parameters

· Ingredients with limit values that require monitoring at the workplace:

The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.

Revision: 23.11.2024

#### Trade name: 420 PLASMIT PASTE: SATIN PASTE

## (Contd. of page 4) · Additional information: Exposure limit for dust: 3 mg/m3 (respirable fraction) 10 mg/m3 (total dust) The lists valid during the making were used as basis. · 8.2 Exposure controls · Appropriate engineering controls No further data; see section 7. Individual protection measures, such as personal protective equipment General protective and hygienic measures: Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing Wash hands before breaks and at the end of work. Avoid contact with the eyes and skin. Do not eat, drink, smoke or sniff while working. Keep the working environment clean and tidy. Ensure that eye wash stations are available at the work place. Provide good ventilation. Respiratory protection: In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device. Use suitable respiratory protective device in case of insufficient ventilation. Hand protection Protective gloves The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation Material of gloves The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application. The gloves should comply to EN374 Penetration time of glove material The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed. Penetration time > 480 min. Eye/face protection Tightly sealed goggles · Body protection: Chemical resistant protective clothing

Antistatic shoes

# SECTION 10: Stability and reactivity

· 10.1 Reactivity No further relevant information available.

· 10.2 Chemical stability

- · Thermal decomposition / conditions to be avoided: Unstable in contact with acids.
- 10.3 Possibility of hazardous reactions No dangerous reactions known.
- 10.4 Conditions to avoid No further relevant information available.
- · 10.5 Incompatible materials: No further relevant information available.
- 10.6 Hazardous decomposition products:

Irritant gases/vapours

Possible in traces.

## **SECTION 11: Toxicological information**

• 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

· Acute toxicity Based on available data, the classification criteria are not met.

· LD/LC50 values relevant for classification:

65997-15-1 Cement, portland, chemicals

Dermal LD50 >2000 mg/kg (rabbit)

9004-62-0 hecellose

LD50 >2000 mg/kg (rat) Oral

Skin corrosion/irritation Causes skin irritation.

- · Serious eye damage/irritation Causes serious eye damage.
- · Respiratory or skin sensitisation May cause an allergic skin reaction.
- Germ cell mutagenicity Based on available data, the classification criteria are not met.
- · Carcinogenicity Based on available data, the classification criteria are not met.
- · Reproductive toxicity Based on available data, the classification criteria are not met.
- · STOT-single exposure May cause respiratory irritation.
- STOT-repeated exposure Based on available data, the classification criteria are not met.
- · Aspiration hazard Based on available data, the classification criteria are not met.
- · 11.2 Information on other hazards
- · Endocrine disrupting properties

None of the ingredients is listed.

# **SECTION 12: Ecological information**

Aquatic to	ixicity:	
9004-62-0	hecellose

- · 12.5 Results of PBT and vPvB assessment
- · **PBT:** Not applicable.
- vPvB: Not applicable.
- 12.6 Endocrine disrupting properties
- The product does not contain substances with endocrine disrupting properties.
- · 12.7 Other adverse effects When reacted with large amounts of water, the pH value increases.
- · Additional ecological information:
- · General notes:

Must not reach sewage water or drainage ditch undiluted or unneutralised.

Water hazard class 1 (German Regulation) (Self-assessment): slightly hazardous for water Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

# SECTION 13: Disposal considerations

· 13.1 Waste treatment methods

· Recommendation

Must not be disposed together with household garbage. Do not allow product to reach sewage system.

- · Uncleaned packaging:
- · *Recommendation:* Disposal must be made according to official regulations.
- · *Recommended cleansing agents:* Water, if necessary together with cleansing agents.
